

BASIC CERTIFICATE IN GENERAL INSURANCE ACTUARIAL PRACTICE (BCGIAP)

1. Introduction

MII will be offering the new **Basic Certificate in General Insurance Actuarial Practice (BCGIAP)** which is endorsed and supported by the **Actuarial Society of Malaysia** and **ISM Insurance Services Malaysia Berhad**.

BCGIAP is to cater to the pressing needs of our industry to have more people that are equipped with the basic understanding and skills in the general insurance actuarial practices especially in the risk-based capital requirement for the general insurance industry.

2. Objective

Upon completing this course, participants would:

- have sufficient basic knowledge to carry out the essential tasks within the actuarial scope.
- be able to better assist the Actuaries in the pricing and reserving activities in a general insurance company.

3. Target audience

Besides staff in actuarial department, this course is also suitable for staff who are dealing with data compilation and forecasting such as in the department of finance, statistic, claims and underwriting.

4. Course Schedule for the 1st Batch

This is a specially designed 4-module course and the schedule of the course with the trainers for respective modules are as follows:
